

DECREE OF RECLAMATION AND VIGILANCE

DECRETUM RECLAMATIONIS, STABILISATIONIS ET VIGILIAE

+++ INSTRUMENTUM IMPERIALIS // ISSUED BY THE ADEPTUS TERRA IN EXECUTION OF THE
LORD COMMANDER'S AUTHORITY +++

+++ RECIPIENT: ADEPTUS ASTARTES CHAPTER - LUNAR DRAGONS +++

By order of Roboute Guilliman, Primarch of the XIII Legion, Lord Commander of the Imperium, Imperial Regent and Avenging Son; entered, sealed and promulgated through the offices of the Adeptus Terra.

PREAMBLE AND RECOGNITION OF SERVICE

Let it be entered into the rolls of the Senatorum Imperialis, the strategic archives of the Indomitus Crusade, the sealed histories of the Adeptus Astartes, and the registries of the Adeptus Terra charged with the preservation and execution of lawful Imperial command.

The warriors of the Lunar Dragons, born of the Ultima Founding and tested beneath the banners of the Indomitus Crusade, have discharged the duties laid before them with distinction. Across the battlefields entrusted to their charge they have broken the enemies of Mankind, relieved worlds thought lost, restored the Emperor's authority, and preserved holdings upon which the greater advance depended.

Where victory could be won, they have won it. Where victory demanded sacrifice, they have paid its price. Their record is not without failure, for no honest chronicle of war may make such a claim; yet those objectives denied them have been few, and none through want of courage, discipline, fidelity, or resolve.

Their deeds are recognised.
Their service is entered into the record.
Their duty is not yet concluded.

ARTICLE I - THE ARGENT VIGIL

+++ NACHMUND RECLAMATION // STRATEGIC DESIGNATION: ARGENT VIGIL +++

+++ MANDATE OF RECLAMATION, STABILISATION AND STRATEGIC VIGILANCE +++

By the authority of the Lord Commander of the Imperium, the Lunar Dragons are hereby detached from the principal advance of the Indomitus Crusade and directed toward the contested reaches surrounding the Nachmund Gauntlet.

There they shall prosecute the reclamation crusade formally designated THE ARGENT VIGIL, charged with the stabilisation and restoration of the contested reaches.

Emperor's realm upon a frontier upon which passage between the sundered halves of the Imperium stands in peril.

THE FOLLOWING DUTIES ARE ENTERED UNDER IMPERIAL SEAL:

- I. To seek those systems cast into isolation by the opening of the Great Rift, and to determine the fate of worlds from which the Emperor's light has been obscured.
- II. To relieve those who yet hold faith with Terra, restore lawful Imperial authority where it may endure, and reclaim that which may be reclaimed.
- III. To destroy that which has fallen beyond redemption, where corruption, treason, xenos dominion or the touch of the Archenemy renders restoration impossible.
- IV. To secure anchorages, supply routes, passages and systems by which the armies, vessels and servants of the Imperium may again move through the contested reaches.
- V. To stand vigil against those powers that would close the Nachmund passage and deepen the sundering of the Emperor's realm.

Where the enemies of Mankind would close the road between the divided Imperium, the Lunar Dragons shall stand.

ARTICLE II - IMPERIAL COOPERATION ORDER

+++ CIRCULATION: ASTRA MILITARUM // NAVIS IMPERIALIS // ADEPTUS MECHANICUS //
ATTACHED IMPERIAL OFFICES +++

To the commanders of the Astra Militarum, the officers of the Navis Imperialis, the priesthood of the Adeptus Mechanicus, and all other servants of the Imperium attached by lawful order to this undertaking:

You are ordered to render such aid, materiel, vessels, soldiery, knowledge, labour and counsel as the prosecution of this Crusade requires, according to your station, your oaths and the necessities of war.

**You do not serve the Lunar Dragons.
You serve the Imperium beside them.**

Let no rivalry of institution, honour, jurisdiction or ancient privilege obstruct the work before you. Command shall be exercised according to the laws, offices and necessities of the Crusade. The Adeptus Astartes shall be the spearpoint where the foe must be broken; the armies of the Imperium shall hold that which is won; the Navis Imperialis shall preserve the road between the stars; and the servants of Mars shall restore, sustain and judge those works of mankind entrusted to their keeping.

No clause of this instrument grants the Lunar Dragons ownership of those forces committed beside them, nor does it diminish the sacred jurisdictions of the Imperium's institutions. It commands cooperation in a common duty under the authority of the Throne and its Regent.

*Entered by order of the Adeptus Terra: the enemy profits whenever the servants of the Throne mistake
pride for honour.*

ARTICLE III - RIGHT OF PERMANENT BASTION

+++ DISPENSATION ENTERED BY IMPERIAL AUTHORITY +++

The Lunar Dragons, having been created amid war and possessing no settled Chapter world, are granted the right to identify and petition for the establishment of a permanent Chapter bastion among those systems restored through their deeds.

Such a world shall be selected not for comfort, vanity or wealth, but for its capacity to sustain the Chapter and defend the approaches entrusted to its vigil. Upon lawful confirmation through the proper Imperial offices, the Chapter may raise there its fortress-monastery, maintain the works necessary to its continuance, and draw such recruits as Imperial law and Chapter right permit.

This grant conveys guardianship, not sovereignty.

The worlds of the Imperium belong to the Emperor. The Lunar Dragons are charged to defend them. Should a world be confirmed for their keeping, their fortress shall be raised not as the seat of kings, but as the bastion of sentinels.

ARTICLE IV - THE GIFT OF LUNA

In recognition of service already rendered, and as token of the trust placed upon the Chapter by the Lord Commander, there is transferred into the keeping of the Lunar Dragons a fragment of Luna: stone of the ancient moon beneath whose watch Mankind first reached beyond the cradle of Terra.

The relic shall accompany the Chapter upon its charge. When a world is lawfully confirmed upon which its vigil shall endure, the stone shall be set within the foundations of its bastion, there to stand as witness to the origin of the Chapter's commission.

FINAL INJUNCTION OF THE LORD COMMANDER

+++ PERSONAL WORDS APPENDED TO THE INSTRUMENT AND SEALED BY AUTHORITY OF THE
IMPERIAL REGENT +++

Before Mankind possessed a million worlds, our forebears looked outward from one
world and its moon.

**Terra is the cradle of our species.
Luna was the first shore beyond it.**

You shall carry a piece of that shore into the darkness.

Let the stone remind you that no fortress is eternal, and that even the greatest works
of Mankind were raised by mortal hands. Let it remind you that strength must serve
duty, that honour must be proven through service, and that victory is not an end in
itself. Its worth lies in what you preserve, what you restore, and what you leave for
those who follow.

You have served with distinction. Now prove yourselves worthy of what has been
entrusted to you.

**GO FORTH, LUNAR DRAGONS.
RECLAIM WHAT HAS BEEN LOST.
GUARD THE PASSAGE.
AND WHERE THE LIGHT OF THE IMPERIUM HAS FAILED, CARRY IT
WITH YOU.**
